U.S. Patent No.	7,588,768 B2	Application No.:	10/713,732
Issued:	September 15, 2009	Filed:	November 14, 2003
Patentee:	Palese <i>et al.</i>	Attorney Docket No:	6923-118
For:	ATTENUATED NEGATIVE STRAND VIRUSES WITH ALTERED INTERFERON ANTAGONIST ACTIVITY FOR USE AS VACCINES AND PHARMACEUTICALS		

**REVISED REQUEST FOR RECONSIDERATION OF  
PATENT TERM ADJUSTMENT UNDER 37 C.F.R. § 1.705(b)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

The above-identified patent issued on September 15, 2009. According to the cover of the patent and the Issue Notification, the Patent Term Adjustment under 35 U.S.C. § 154(b) is 166 days.

In response to the PTO calculation of the Patent Term Adjustment of 166 days, and further to the Decision On Application For Patent Term Adjustment, mailed August 13, 2009 (“Decision”; a copy of which is submitted herewith as Exhibit A), Patentee hereby submits a Revised Request for Reconsideration of Patent Term Adjustment Under 37 C.F.R. § 1.705(b), originally filed on June 12, 2009 (“Original Request”; a copy of which is also submitted herewith as Exhibit B). Patentee submits the Revised Request in view of the issuance of the above-identified patent, whereas the Original Request was filed together with an authorization of payment of the Issue Fee and was thus based on an estimated patent issue date.

Patentee hereby respectfully requests reconsideration of the patent term adjustment indicated on the cover of the issued patent and in the Determination of Patent Term

Adjustment under 35 U.S.C. § 154(b) (“Determination”) mailed with the Issue Notification. Specifically, Patentee believes that the patent term adjustment of 166 days is not correct. The correct number of days for the patent term adjustment, for reasons explained below, should be, at a minimum, equal to the period starting January 14, 2005 and ending September 6, 2006 (600 days) plus the period starting November 15, 2006 and ending on April 11, 2008, the date that a request for continued examination (RCE) was filed (514 days) (*see* 37 C.F.R. §§ 1.702(b)(1) and 1.703(b)(1)), minus 372 days consumed by Applicant delay (*see* 37 C.F.R. § 1.704(b)). Therefore, Patentee believes that the patent term adjustment should be, at a minimum, a total of 742 days.

A request for reconsideration of patent term adjustment under 37 C.F.R. § 1.705(b) must be accompanied by:

- (1) the fee set forth in 37 C.F.R. § 1.18(e); and
- (2) a statement of the facts involved, specifying:
  - (i) the correct patent term adjustment and the basis or bases under 37 C.F.R. § 1.702 for the adjustment;
  - (ii) the relevant dates as specified in 37 C.F.R. §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 C.F.R. § 1.703(f) to which the patent is entitled;
  - (iii) whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and
  - (iv)(A) any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 C.F.R. § 1.704; or
  - (B) that there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 C.F.R. § 1.704.

*See* 37 C.F.R. § 1.705(b).

In support of this request, Patentee submits the following statement of facts:

**1. Fee Required Under 37 C.F.R. § 1.705(b)(1)**

Pursuant to 37 C.F.R. §§ 1.705(b)(1) and § 1.18(e), the fee required for filing this application is believed to be \$200.00. This fee was submitted with the Original Request filed

on June 12, 2009 and is acknowledged in the Decision. Therefore, Patentee seeks consideration of the Revised Request without payment of an additional fee. This Revised Request is submitted to update the Original Request, filed under 37 C.F.R. § 1.702(b), based on knowledge of the actual date that the patent has issued. No new grounds for reconsideration are presented.

However, if any additional fees are required, please charge them to Jones Day Deposit Account No. 50-3013 (referencing 702827-999117).

**2. Statement Required Under 37 C.F.R. § 1.705(b)(2)**

Pursuant to 37 C.F.R. § 1.702, Patentee submits the following statement of facts in support of this application:

- (i) The correct patent term adjustment and the basis or bases under 37 C.F.R. § 1.702 for the adjustment are as follows:

**1. Correct patent term adjustment:**

The correct patent term adjustment is 742 days, which is attributable to (a) the failure of the PTO to mail a notification under 35 U.S.C. § 132 not later than fourteen months after the date of filing, under 35 U.S.C. § 111(a), of the application on which this patent is based, Application No. 10/713,732 (the “ ’732 application”) (delay under 37 C.F.R. § 1.702(a)(1)) (the “A period”) minus the number of actual calendar days occurring in both the A period and in the “B period” described below; and (b) the failure of the PTO to issue a patent within three years of the actual filing date of the ’732 application (delay under 37 C.F.R. § 1.702(b)) (the “B period”), and minus the time consumed by Applicant delay as provided for in 37 C.F.R. § 1.704(b).

**2. Bases under 37 C.F.R. § 1.702 for the adjustment:**

**(a) Delay under 37 C.F.R. § 1.702(a) (the “A period”)**

The delay by the PTO under 37 C.F.R. § 1.702(a) is 600 days.

As acknowledged by the PTO in its calculation of the patent term adjustment, the PTO failed to mail a notification under 35 U.S.C. § 132 within fourteen months from the date of filing of the ’732 application. *See* PTO’s Patent Application Information Retrieval page for U.S. Application No. 10/713,732 at Patent Term Adjustment History (“PTO PAIR Adjustment,” Exhibit C, downloaded November 9, 2009). The ’732 application was filed

under 35 U.S.C. § 111(a) on November 14, 2003. The first notification under 35 U.S.C. § 132 (a Restriction Requirement) was mailed by the PTO on September 6, 2006. Accordingly, the PTO did not mail a notification under 35 U.S.C. § 132 or a notice of allowance under 35 U.S.C. § 151 within fourteen months after the date on which the application was filed (*i.e.*, by January 14, 2005), and thus, the delay under 37 C.F.R. § 1.702(a)(1) includes 600 days.

In sum, the number of days of delay in the A period, that is, under subsection (a)(1) of 37 C.F.R. § 1.702 is, at a minimum, 600 days.

(b) Delay under 37 C.F.R. § 1.702(b) (the “B period”)

The delay by the PTO under 37 C.F.R. § 1.702(b) is 514 days.

The '732 application was filed under 35 U.S.C. § 111(a) on November 14, 2003. A patent based on this application issued on September 15, 2009. As provided for under 37 C.F.R. §§ 1.702(b)(1) and 1.703(b)(1), the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to issue a patent within three years after the date on which the application was filed, not including the number of days in the period beginning on the date on which an RCE was filed and ending on the date the patent was issued. Therefore, in this case, the “B period” begins on November 15, 2006 and ends on April 11, 2008, the date that an RCE was filed (514 days). This delay in issuance of the patent was not included by the PTO in its calculation of patent term adjustment (*see* “PTO PAIR Adjustment,” Exhibit C). Therefore, the total patent term adjustment for delay in issuance of the patent under the B period is 514 days.

(c) Overlapping Days in the Delay Periods

According to 35 U.S.C. § 154(b)(2)(A): “To the extent that periods of delay attributable to grounds specified in paragraph (1) *overlap*, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.” *See* 35 U.S.C. § 154(b)(2)(A).

Patentee submits that there was no overlap of the actual calendar days of the A period, discussed in detail below, with the actual calendar days of the B period. Thus, the period of patent term adjustment on a patent that issues on the above-identified patent application is calculated as the sum of 600 plus 514, which is equal to 1,114 days (minus the time consumed by Applicant delay as discussed in Section ii below).

Patentee respectfully submits that under controlling case law, calculating the patent term adjustment is the result of summing the number of days of delay under 37 C.F.R. § 1.702(a) that do not comprise actual calendar days occurring in the B period (that is, the A period minus calendar days overlapping in both the A and B periods) and the number of days of delay under 37 C.F.R. § 1.702(b) (the B period). *See Wyeth v. Dudas*, 580 F.Supp.2d 138 (D.D.C. 2008) (hereinafter *Wyeth*), a copy of which is included here as Exhibit D.

In *Wyeth*, the Court held that “the only way that periods of time can ‘overlap’ is if they occur on the same day [and thus, if] an ‘A delay’ occurs on one calendar day and a ‘B delay’ occurs on another, they do not overlap.”

Turning to the '732 application, the period of delay under subsection (a)(1) of 37 C.F.R. § 1.702 includes the days of January 15, 2005 to September 6, 2006 (600 days). The delay under 37 C.F.R. § 1.702(b) comprises November 15, 2006 to April 11, 2008, the day on which an RCE was filed (514 days). Thus, the delay under 37 C.F.R. § 1.702(a)(1) occurring from January 15, 2005 to September 6, 2006 occurred on different calendar days than the delay under 37 C.F.R. § 1.702(b) (November 15, 2006 to April 11, 2008). Consequently, under 35 U.S.C. § 154(b)(2)(A), there are 600 days under 37 C.F.R. § 1.702(a) that do not overlap the 514 days of delay under 37 C.F.R. § 1.702(b) for the '732 application, and therefore the total delay under 37 C.F.R. § 1.702 for the adjustment should be a summation of the delays under 37 C.F.R. § 1.702(a) and 37 C.F.R. § 1.702(b), or 1,114 days (the sum of 600 and 514 days).

- (ii) The relevant dates as specified in 37 C.F.R. §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 C.F.R. § 1.703(f) and 37 C.F.R. § 1.704(b) are as follows:

- 1. Adjustment under 37 C.F.R. §§ 1.703(a) through (e):

An adjustment is sought under 37 C.F.R. § 1.703(a)(1), which provides, in relevant part, that the period of adjustment is “[t]he number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.” In particular, Patentee seeks to include the delay under 37 C.F.R. § 1.702(a)(1) occurring from

January 15, 2005 to September 6, 2006 (600 days) that occurred on different calendar days than the delay under 37 C.F.R. § 1.702(b).

An adjustment is sought under 37 C.F.R. § 1.703(b), which provides, in relevant part, that “the period of adjustment under 37 C.F.R. § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a) ... and ending on the date a patent was issued . . not including ... [t]he number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued.”

Patentee submits that this period consists of 514 days for the period beginning the day after November 14, 2006 (the date that is three years after the date on which the '732 application was filed) and ending on the day that an RCE was filed, April 11, 2008.

Patentee further submits that the 600 actual calendar days of delay under 37 C.F.R. § 1.702(a) do not overlap the any of the 514 actual calendar days of delay under 37 C.F.R. § 1.702(b), as explained above.

Accordingly, Patentee believes that the delays attributable to PTO delay under 37 C.F.R. § 1.702 total 1,114 days.

2. Adjustment under 37 C.F.R. § 1.704(b):

As discussed in section (i) above, Patentee believes that the total delay by the PTO under 37 C.F.R. § 1.702(a) and (b) amounts to 1,114 days.

In the PTO PAIR Adjustment, the PTO determination the Applicant delay to be a period of 434 days. Patentee respectfully disagrees with this determination, and believes that the delay attributable to Applicants under 37 C.F.R. § 1.704(b) is 372 days, for the reasons set forth below.

Patentee accepts the determination of the 302 days of Applicant delay until March 4, 2009 set forth on the PTO PAIR Adjustment. A Notice of Allowance was mailed on March 13, 2009, so all subsequent determinations of Applicant delay should be under 37 C.F.R. § 1.704(c)(10) (stating, in relevant part, that for a submission of a paper “after a notice of allowance has been mailed,” “the period of adjustment set forth in 1.703 shall be reduced by . . . [t]he number of days, if any, beginning on the date the ... other paper was filed and ending on the mailing date of the ... notice in response to the ... other such paper”). According to the PTO PAIR Adjustment, it appears that the PTO determined that there were

68 days of Applicant delay from the period beginning on the date of filing of an alleged “Miscellaneous Incoming Letter” on May 7, 2009 and ending on July 14, 2009, the day a second alleged Miscellaneous Incoming Letter was filed (the “2nd Letter”). Patentee believes that this determination is in error, because the period of delay should have been calculated from the period beginning the day the alleged Miscellaneous Incoming Letter was filed and ending on May 12, 2009, the date the PTO mailed a response to the Miscellaneous Incoming Letter, *i.e.*, 6 days. Specifically, according to the file history of the ’732 application, the May 7, 2009 filing by Applicants consists of a Petition to Expunge Proprietary or Trade Secret Material Pursuant to 37 C.F.R. § 1.59 and its transmittal, a Submission of Proprietary or Trade Secret Material Pursuant to MPEP § 724 (collectively, the “Petition”; a copy of the Petition from the file history is submitted herewith as Exhibit E). A Decision on the Petition was mailed by the PTO on May 12, 2009 (a copy of which is submitted herewith as Exhibit F). Thus, Patentee believes that the period of delay for submission of the Petition should not have ended on the date the 2nd Letter was filed but rather should have ended on the date the Decision on the Petition was mailed (May 12, 2009), *i.e.*, 6 days.

Patentee accepts the PTO determination, in the PTO PAIR Adjustment, of the Applicant delay of 64 days in connection with the filing of the 2nd Letter on July 14, 2009, based on the understanding that the delay was calculated as the number of days in the period beginning the day after July 14, 2009, when the 2nd Letter was filed, and ending on September 15, 2009, the day that the patent issued.

It is also respectfully noted that according to the PTO PAIR Adjustment, a Statement Indicating a Loss of Entitlement to Small Entity Status (“statement”) was filed on June 12, 2009. Patentee wishes to point out that no such statement was filed on June 12, 2009. Rather, a Request for Reconsideration of Patent Term Adjustment was filed on June 12, 2009, which does not contribute to Applicant delay. *See* 37 C.F.R. § 1.704(e).

Patentee thus believes that the delay attributable to Applicants under 37 C.F.R. § 1.704(b) is 302 days, plus 6 days, plus 64 days, *i.e.*, 372 days, and not 434 days as calculated by the PTO. Therefore, Patentee believes that the total period of adjustment due under 37 C.F.R. § 1.703(f) is 1,114 days minus 372 days, *i.e.*, 742 days, not the 166 days calculated by the PTO. This total period is the sum of the periods of delay by the PTO calculated under 37 C.F.R. §§ 1.702(a) through (e) (*i.e.*, 600 days plus 514 days), less the sum of the period calculated under Section 1.704(b) (*i.e.*, 372 days).

- (iii) The '732 application is not subject to a terminal disclaimer.
- (iv) Aside from the circumstances described in Section ii(2) *supra*, Patentee believes that there were no other circumstances under 37 C.F.R. § 1.704 constituting a failure by Applicants to engage in reasonable efforts to conclude processing or examination of the '732 application.

In summary, the total adjustment under 37 C.F.R. § 1.702(a) and (b) is 1,114 days, the total delay attributable to Applicants under 37 C.F.R. § 1.704 is 372 days, and thus the total period of adjustment due under 37 C.F.R. § 1.703(f) is believed to be 742 days. Accordingly, Patentee respectfully requests an adjustment of patent term under 37 C.F.R. § 1.703(f) totaling 742 days.

Patentee submits that the issues raised in this revised request for reconsideration of patent term adjustment are timely raised. In particular, this request is in compliance with 37 C.F.R. § 1.705(b) and 37 C.F.R. § 1.705(d), the latter of which provides in relevant part, that "[i]f there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment . . . [and] any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued . . . ." This is consistent with the Decision, in which Patentee was informed that "[a]ny request for reconsideration of the patent term adjustment indicated on the patent must be timely filed within 2 months after issuance pursuant to 37 CFR 1.705(d) . . . ." Since the date two months from the September 15, 2009 issue date falls on a Sunday, this request for reconsideration of patent term adjustment is timely filed on November 16, 2009.

Respectfully submitted,

Date: November 16, 2009

Laura A. Coruzzi 30,742

MAILED

AUG 13 2009

In re Application of :  
Palese, et al. :  
Application No. 10/713,732 : ON APPLICATION FOR  
Filed: November 14, 2003 : PATENT TERM ADJUSTMENT  
Atty Docket No. 6923-118 :

OFFICE OF PETITIONS

This is in response to the REQUEST FOR RECONSIDERATION OF PATENT TERM ADJUSTMENT UNDER 37 C.F.R. § 1.705(b), filed June 12, 2009. Applicants submit that the correct patent term adjustment to be indicated on the patent is eight hundred twelve (812) days<sup>1</sup>, not two hundred ninety-eight (298) days as calculated by the Office as of the mailing of the initial determination of patent term adjustment. Applicants request this correction solely on the basis that the Office will take in excess of three years to issue this patent.

As the instant application for patent term adjustment requests reconsideration of the patent term adjustment as it relates to the Office's failure to issue the patent within 3 years of the filing date, the application for patent term adjustment under 37 CFR 1.705(b) is **DISMISSED as PREMATURE.**

Knowledge of the actual date the patent issues is required to calculate the amount, if any, of additional patent term patentees are entitled to for Office failure to issue the patent within 3 years. See § 1.702(b). (This is true even in this instance where a request for continued examination (RCE) was filed.) The computer will not undertake the § 1.702(b) calculation until the actual date of issuance of the patent has been determined. Likewise, the computer will not calculate any further Office delay under § 1.702(a)(4) or applicant delay under § 1.704(c)(10) until the actual date of issuance of the patent has been determined. As such, the Office can not make a determination on the correctness of the patent term adjustment until the patent has issued.

<sup>1</sup> This calculation is based on a projected issuance date of October 6, 2009.

Requesting reconsideration of the patent term adjustment to be indicated on the patent under 37 CFR 1.705(b) based on the initial determination of patent term adjustment and a projected issuance date of the patent (or even the filing date of the request for continued examination) is premature. Accordingly, it is appropriate to dismiss as premature such a request.

Rather than file an application for patent term adjustment under 37 CFR 1.705(b) contesting the 37 CFR 1.702(b) calculation at the time of the mailing of the notice of allowance, applicants are advised that they may wait until the time of the issuance of the patent and file a request for reconsideration of the patent term adjustment pursuant to 37 CFR 1.705(d). As the USPTO does not calculate the amount of time earned pursuant to 37 CFR 1.702(b) until the time of the issuance of the patent, the Office will consider any request for reconsideration of the patent term adjustment due to an error in the calculation of 37 CFR 1.702(b) to be timely if the request for reconsideration is filed within two months of the issuance of the patent. However, as to all other bases for contesting the initial determination of patent term adjustment received with the notice of allowance, applicants must timely file an application for patent term adjustment prior to the payment of the issue fee<sup>1</sup>.

The Office acknowledges submission of the \$200.00 fee set forth in 37 CFR 1.18(e) for consideration of the application for patent term adjustment under 37 CFR 1.705(b).

Any request for reconsideration of the patent term adjustment indicated on the patent must be timely filed within 2 months after issuance pursuant to 37 CFR 1.705(d) and must include payment of the required fee under 37 CFR 1.18(e).

The Office of Data Management has been advised of this decision. This application is being referred to the Office of Data Management for issuance of the patent.

---

<sup>1</sup> For example, if applicant disputes both the calculation of patent term adjustment under 37 CFR 1.702(a)(1) for Office failure to mail a first Office action or notice of allowance not later than fourteen months after the date on which the application was filed and under 37 CFR 1.702(b) for Office failure to issue a patent within three years of the actual filing date of the application, then applicant must still timely file an application for patent term adjustment prior to the payment of the issue fee to contest the calculation of Office delay in issuing a first Office action or notice of allowance. See 37 CFR 1.705(b) and 35 U.S.C. 154(b)(3)(B). A dispute as to the calculation of the §1.702(a)(1) period raised on request for reconsideration of patent term adjustment under 37 CFR 1.705(d) will be dismissed as untimely filed.

Telephone inquiries specific to this decision should be directed to Senior Petitions Attorney Shirene Willis Brantley at (571) 272-3230.

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Applicants received a Notice of Allowance, mailed March 13, 2009, from the United States Patent and Trademark Office ("PTO") in connection with Application No. 10/713,732 (hereinafter "the '732 application"), together with a Determination of Patent Term Adjustment under 35 U.S.C. 154(b) stating that the projected patent term adjustment to date is 298 days.

Applicants hereby respectfully request reconsideration of the patent term adjustment indicated in the Determination of Patent Term Adjustment under 35 U.S.C. 154(b) ("Determination") mailed March 13, 2009. Specifically, Applicants believe that the patent term adjustment of 298 days is not correct. The correct number of days for the patent term adjustment, for reasons explained below, should be, at a minimum, equal to the period starting January 14, 2005 and ending September 6, 2006 (600 days) plus the period starting November 15, 2006 and ending on April 11, 2008, the date that a request for continued examination (RCE) was filed (estimated to be 514 days) (see 37 C.F.R. §§ 1.702(b)(1) and 1.703(b)(1)), minus 302 days consumed by Applicant delay (see 37 C.F.R. § 1.704(b)). For

the purpose of this Request, Applicants assume that the patent will issue on the '732 application on October 6, 2009, which is the Tuesday before the date that is four months after the mailing date of the issue fee payment, which accompanies this Request. Therefore, Applicants believe that the patent term adjustment should be, at a minimum, a total of 812 days.

A request for reconsideration of patent term adjustment under 37 C.F.R. § 1.705(b) must be accompanied by:

- (1) the fee set forth in 37 C.F.R. § 1.18(e); and
- (2) a statement of the facts involved, specifying:
  - (i) the correct patent term adjustment and the basis or bases under 37 C.F.R. § 1.702 for the adjustment;
  - (ii) the relevant dates as specified in 37 C.F.R. §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 C.F.R. § 1.703(f) to which the patent is entitled;
  - (iii) whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and
  - (iv)(A) any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 C.F.R. § 1.704; or  
(B) that there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 C.F.R. § 1.704.

See 37 C.F.R. § 1.705(b).

In support of this request, Applicants submit the following statement of facts:

**1. Fee Required Under 37 C.F.R. § 1.705(b)(1)**

Pursuant to 37 C.F.R. §§ 1.705(b)(1) and § 1.18(e), the fee required for filing this application is believed to be \$200.00.

Please charge the required fee to Jones Day Deposit Account No. 50-3013 (referencing 702827-999117).

**2. Statement Required Under 37 C.F.R. § 1.705(b)(2)**

Pursuant to 37 C.F.R. § 1.702, Applicants submit the following statement of facts in support of this application:

- (i) The correct patent term adjustment and the basis or bases under 37 C.F.R. § 1.702 for the adjustment are as follows:

1. Correct patent term adjustment:

The correct patent term adjustment is 812 days, assuming that the patent will issue on the above-identified application on October 6, 2009, which is attributable to (a) the failure of the PTO to mail a notification under 35 U.S.C. § 132 not later than fourteen months after the date on which the '732 application was filed under 35 U.S.C. 111(a) (delay under 37 C.F.R. § 1.702(a)(1)) (the "A period") minus the number of actual calendar days occurring in both the A period and in the "B period" described below; and (b) the failure of the PTO to issue a patent within three years of the actual filing date of the '732 application (delay under 37 C.F.R. § 1.702(b)) (the "B period"), and minus the time consumed by Applicant delay as provided for in 37 C.F.R. § 1.704(b).

2. Bases under 37 C.F.R. § 1.702 for the adjustment:

(a) Delay under 37 C.F.R. § 1.702(a) (the "A period")

The delay by the PTO under 37 C.F.R. § 1.702(a) is 600 days.

As acknowledged by the PTO in its calculation of the patent term adjustment, the PTO failed to mail a notification under 35 U.S.C. § 132 within fourteen months from the date of filing of the '732 application. *See* PTO's Patent Application Information Retrieval page for U.S. Application No. 10/713,732 at Patent Term Adjustment History ("PTO PAIR Adjustment," Exhibit A, downloaded June 11, 2009). The '732 application was filed under 35 U.S.C. § 111(a) on November 14, 2003. The first notification under 35 U.S.C. § 132 (a Restriction Requirement) was mailed by the PTO on September 6, 2006. Accordingly, the PTO did not mail a notification under 35 U.S.C. § 132 or a notice of allowance under 35 U.S.C. § 151 within fourteen months after the date on which the application was filed (*i.e.*, by January 14, 2005), and thus, assuming that the patent will issue on the above-identified application on or before October 6, 2009, the delay under 37 C.F.R. § 1.702(a)(1) includes 600 days.

In sum, the number of days of delay in the A period, that is, under subsection (a)(1) of 37 C.F.R. § 1.702 is, at a minimum, 600 days.

(b) Delay under 37 C.F.R. § 1.702(b) (the "B period")

The delay by the PTO under 37 C.F.R. § 1.702(b) is 514 days.

The '732 application was filed under 35 U.S.C. § 111(a) on November 14, 2003. A patent has not yet issued, however, an Issue Fee payment authorization accompanies this Request. As provided for under 37 C.F.R. §§ 1.702(b)(1) and 1.703(b)(1), the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to issue a patent within three years after the date on which the application was filed, not including the number of days in the period beginning on the date on which an RCE was filed and ending on the date the patent was issued. Therefore, in this case, the "B period" begins on November 15, 2006 and ends on April 11, 2008, the date that an RCE was filed (514 days). This delay in issuance of the patent was not included by the PTO in its calculation of patent term adjustment (*see* "PTO PAIR Adjustment," Exhibit A). Therefore, the total patent term adjustment for delay in issuance of the patent under the B period is 514 days.

(c) Overlapping Days in the Delay Periods

According to 35 U.S.C. § 154(b)(2)(A): "To the extent that periods of delay attributable to grounds specified in paragraph (1) *overlap*, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed." *See* 35 U.S.C. § 154(b)(2)(A).

Applicants submit that there was no overlap of the actual calendar days of the A period, discussed in detail below, with the actual calendar days of the B period. Thus, the period of patent term adjustment on a patent that issues on the above-identified patent application is calculated as the sum of 600 plus 514, which is equal to 1,114 days (minus the time consumed by Applicant delay as discussed in Section ii below).

Applicants respectfully submit that under controlling case law, calculating the patent term adjustment is the result of summing the number of days of delay under 37 C.F.R. § 1.702(a) that do not comprise actual calendar days occurring in the B period (that is, the A period minus calendar days overlapping in both the A and B periods) and the number of days of delay under 37 C.F.R. § 1.702(b) (the B period). *See Wyeth v. Dudas*, 580 F.Supp.2d 138 (D.D.C. 2008) (hereinafter *Wyeth*), a copy of which is included here as Exhibit B.

In *Wyeth*, the Court held that “the only way that periods of time can ‘overlap’ is if they occur on the same day [and thus, if] an ‘A delay’ occurs on one calendar day and a ‘B delay’ occurs on another, they do not overlap.”

Turning to the '732 application, the period of delay under subsection (a)(1) of 37 C.F.R. § 1.702 includes the days of January 15, 2005 to September 6, 2006 (600 days). The delay under 37 C.F.R. § 1.702(b) comprises November 15, 2006 to April 11, 2008, the day on which an RCE was filed (514 days). Thus, the delay under 37 C.F.R. § 1.702(a)(1) occurring from January 15, 2005 to September 6, 2006 occurred on different calendar days than the delay under 37 C.F.R. § 1.702(b) (November 15, 2006 to April 11, 2008). Consequently, under 35 U.S.C. § 154(b)(2)(A), there are 600 days under 37 C.F.R. § 1.702(a) that do not overlap the 514 days of delay under 37 C.F.R. § 1.702(b) for the '732 application, and therefore the total delay under 37 C.F.R. § 1.702 for the adjustment should be a summation of the delays under 37 C.F.R. § 1.702(a) and 37 C.F.R. § 1.702(b), or 1,114 days (the sum of 600 and 514 days), assuming that the patent on the '732 application issues on Tuesday, October 6, 2009, which is the Tuesday before the date that is four months after the mailing date of the issue fee payment, which accompanies this Request.

- (ii) The relevant dates as specified in 37 C.F.R. §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 C.F.R. § 1.703(f) and 37 C.F.R. § 1.704(b) are as follows:

- 1. Adjustment under 37 C.F.R. §§ 1.703(a) through (e):

An adjustment is sought under 37 C.F.R. § 1.703(a)(1), which provides, in relevant part, that the period of adjustment is “[t]he number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.” In particular, Applicants seek to include the delay under 37 C.F.R. § 1.702(a)(1) occurring from January 15, 2005 to September 6, 2006 (600 days) that occurred on different calendar days than the delay under 37 C.F.R. § 1.702(b).

An adjustment is sought under 37 C.F.R. § 1.703(b), which provides, in relevant part, that “the period of adjustment under 37 C.F.R. § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a)...and ending on the date a patent was issued . .

not including . . . [t]he number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued.”

Applicants submit that this period consists of 514 days for the period beginning the day after November 14, 2006 (the date that is three years after the date on which the '732 application was filed) and ending on the day that an RCE was filed, April 11, 2008.

Applicants further submit that the 600 actual calendar days of delay under 37 C.F.R. § 1.702(a) do not overlap the any of the 514 actual calendar days of delay under 37 C.F.R. § 1.702(b), as explained above.

Accordingly, Applicants believe that the delays attributable to PTO delay under 37 C.F.R. § 1.702 total 1,114 days.

2. Adjustment under 37 C.F.R. § 1.704(b):

As discussed in section (i) above, Applicants believe that the total delay by the PTO under 37 C.F.R. § 1.702(a) and (b) amounts to 1,114 days. Applicants believe that there was a period of 302 days constituting a delay attributable to Applicants under 37 C.F.R. § 1.704(b). Therefore, assuming that the patent on the '732 application issues on or before October 6, 2009, Applicants believe that the total period of adjustment due under 37 C.F.R. § 1.703(f) is 812 days, not the 298 days calculated by the PTO. This total period is the sum of the periods of delay by the PTO calculated under 37 C.F.R. §§ 1.702(a) through (e) (*i.e.*, 600 days plus 514 days), less the sum of the period calculated under Section 1.704(b) (*i.e.*, 302 days).

- (iii) The '732 application is not subject to a terminal disclaimer.
- (iv) Aside from the circumstances described in Section ii(2) *supra*, Applicants believe that there were no other circumstances under 37 C.F.R. § 1.704 constituting a failure by Applicants to engage in reasonable efforts to conclude processing or examination of the '732 application.

In summary, the total adjustment under 37 C.F.R. § 1.702(a) and (b) is 1,114 days, the total delay attributable to Applicants under 37 C.F.R. § 1.704 is 302 days, and thus the total period of adjustment due under 37 C.F.R. § 1.703(f) is believed to be 812 days. Accordingly, Applicants respectfully request an adjustment of patent term under 37 C.F.R. § 1.703(f) totaling 812 days.

Applicants submit that the issues raised in this request for reconsideration of patent term adjustment are timely raised under 37 C.F.R. § 1.705(b), which provides in relevant part, that “[a]n application for patent term adjustment under this section *must be filed no later than the payment of the issue fee...*” (emphasis added). An Issue Fee Payment Authorization accompanies this Request, hence Applicants submit that the issues raised in this request are timely raised.

Respectfully submitted,

Date: June 12, 2009

**EXHIBIT B: Copy of *Wyeth v. Dudas***

cent of his annual workload. *Id.* at 15:12–16. Moreover, according to Geiseler, the need to review proposed legislation and FDIC regulations, tasks that had also been performed by the plaintiff, had diminished. *Id.* at 16:14–17:22.

In the final analysis, the Court is not persuaded that the plaintiff has provided sufficient evidence to persuade a reasonable jury that “the defendant intentionally discriminated against [her]. . . .” *Burdine*, 450 U.S. at 253, 101 S.Ct. 1089. Accordingly, the defendant is entitled to summary judgment on the plaintiff’s Title VII race discrimination claim.

#### IV. Conclusion

For the foregoing reasons, the Court concludes that the plaintiff has failed to show that the defendant’s legitimate, non-discriminatory reason for her reassignment was a pretext for discrimination and therefore the defendant’s motion for summary judgment must be granted.

**SO ORDERED** on this 30th day of September, 2008.<sup>10</sup>

WYETH, et al., Plaintiffs,

v.

Jon W. DUDAS, Under Secretary of  
Commerce for Intellectual Property  
and Director of U.S. Patent and  
Trademark Office, Defendant.

Civil Action No. 07–1492 (JR).

United States District Court,  
District of Columbia.

Sept. 30, 2008.

**Background:** Patent owners brought action challenging method used by Patent

and Trademark Office (PTO) to calculate extensions of patent terms for certain specified kinds of PTO delay.

**Holding:** The District Court, James Robertson, J., held that extension of patent term based on PTO delay could exceed three years.

Ordered accordingly.

#### 1. Patents ⇄133

Patent and Trademark Office’s (PTO) interpretation of statute providing extensions of patent terms for certain specified kinds of PTO delay was not entitled to *Chevron* deference. 35 U.S.C.A. § 154(b)(2)(C)(iii), (b)(3)(A).

#### 2. Patents ⇄133

Extension of patent term for any administrative delay by Patent and Trademark Office (PTO) in issuing patent more than three years after filing date did not necessarily overlap with extensions provided as result of PTO’s failure to comply with enumerated statutory deadlines, and thus statutory prohibition against double-counting did not preclude patent applicants from claiming extensions in excess of three years. 35 U.S.C.A. § 154(b).

David O. Bickart, Kaye Scholer LLP, Washington, DC, Patricia A. Carson, Kaye Scholer LLP, New York, NY, for Plaintiffs.

Fred Elmore Haynes, U.S. Attorney’s Office, Washington, DC, for Defendant.

opinion.

10. An Order consistent with this Court’s ruling is being issued simultaneously with this

**MEMORANDUM OPINION**

JAMES ROBERTSON, District Judge.

Plaintiffs here take issue with the interpretation that the United States Patent and Trademark Office (PTO) has imposed upon 35 U.S.C. § 154, the statute that prescribes patent terms. Section 154(a)(2) establishes a term of 20 years from the day on which a successful patent application is first filed. Because the clock begins to run on this filing date, and not on the day the patent is actually granted, some of the effective term of a patent is consumed by the time it takes to prosecute the application. To mitigate the damage that bureaucracy can do to inventors, the statute grants extensions of patent terms for certain specified kinds of PTO delay, 35 U.S.C. § 154(b)(1)(A), and, regardless of the reason, whenever the patent prosecution takes more than three years. 35 U.S.C. § 154(b)(1)(B). Recognizing that the protection provided by these separate guarantees might overlap, Congress has forbidden double-counting: "To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed." 35 U.S.C. § 154(b)(2)(A). Plaintiffs claim that the PTO has misconstrued or misapplied this provision, and that the PTO is denying them a portion of the term Congress has provided for the protection of their intellectual property rights.

#### Statutory Scheme

Until 1994, patent terms were 17 years from the date of issuance. *See* 35 U.S.C. § 154 (1992) ("Every patent shall contain ... a grant ... for the term of seventeen years ... of the right to exclude others

from making, using, or selling the invention throughout the United States...."). In 1994, in order to comply with treaty obligations under the General Agreement on Tariffs and Trade (GATT), the statute was amended to provide a 20-year term from the date on which the application is first filed. *See* Pub.L. No. 103-465, § 532, 108 Stat. 4809, 4984 (1994). In 1999, concerned that extended prosecution delays could deny inventors substantial portions of their effective patent terms under the new regime, Congress enacted the American Inventors Protection Act, a portion of which—referred to as the Patent Term Guarantee Act of 1999—provided for the adjustments that are at issue in this case. Pub.L. No. 106-113, §§ 4401-4402, 113 Stat. 1501, 1501A-557 (1999).

As currently codified, 35 U.S.C. § 154(b) provides three guarantees of patent term, two of which are at issue here. The first is found in subsection (b)(1)(A), the "[g]uarantee of prompt Patent and Trademark Office response." It provides a one-day extension of patent term for every day that issuance of a patent is delayed by a failure of the PTO to comply with various enumerated statutory deadlines: fourteen months for a first office action; four months to respond to a reply; four months to issue a patent after the fee is paid; and the like. *See* 35 U.S.C. § 154(b)(1)(A)(i)-(iv). Periods of delay that fit under this provision are called "A delays" or "A periods." The second provision is the "[g]uarantee of no more than 3-year application pendency." Under this provision, a one-day term extension is granted for every day greater than three years after the filing date that it takes for the patent to issue, regardless of whether the delay is the fault of the PTO.<sup>1</sup> *See* 35 U.S.C.

1. Certain reasons for exceeding the three-year pendency period are excluded, *see* 35 U.S.C.

§ 154(b)(1)(b)(i)-(iii), as are periods attribut-

§ 154(b)(1)(B). The period that begins after the three-year window has closed is referred to as the “B delay” or the “B period”. (“C delays,” delays resulting from interferences, secrecy orders, and appeals, are similarly treated but were not involved in the patent applications underlying this suit.)

The extensions granted for A, B, and C delays are subject to the following limitation:

**(A) In general.**—To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

35 U.S.C. § 154(b)(2)(A). This provision is manifestly intended to prevent double-counting of periods of delay, but understanding that intent does not answer the question of what is double-counting and what is not. Proper interpretation of this proscription against windfall extensions requires an assessment of what it means for “periods of delay” to “overlap.”

The PTO, pursuant to its power under 35 U.S.C. § 154(b)(3)(A) to “prescribe regulations establishing procedures for the application for and determination of patent term adjustments,” has issued final rules and an “explanation” of the rules, setting forth its authoritative construction of the double-counting provision. The rules that the PTO has promulgated essentially parrot the statutory text, *see* 37 C.F.R. § 1.703(f), and so the real interpretive act is found in something the PTO calls its Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. § 154(b)(2)(A), which was published on

June 21, 2004, at 69 Fed.Reg. 34238. Here, the PTO “explained” that:

the Office has consistently taken the position that if an application is entitled to an adjustment under the three-year pendency provision of 35 U.S.C. § 154(b)(1)(B), *the entire period during which the application was pending before the Office* (except for periods excluded under 35 U.S.C. § 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, *is the relevant period under 35 U.S.C. § 154(b)(1)(B) in determining whether periods of delay “overlap” under 35 U.S.C. 154(b)(2)(A).*

69 Fed.Reg. 34238 (2004) (emphasis added). In short, the PTO’s view is that any administrative delay under § 154(b)(1)(A) overlaps any 3-year maximum pendency delay under § 154(b)(1)(B): the applicant gets credit for “A delay” or for “B delay,” whichever is larger, but never A + B.

In the plaintiffs’ submission, this interpretation does not square with the language of the statute. They argue that the “A period” and “B period” overlap only if they occur on the same calendar day or days. Consider this example, proffered by plaintiff: A patent application is filed on 1/1/02. The patent issues on 1/1/08, six years later. In that six-year period are two “A periods,” each one year long: (1) the 14-month deadline for first office action is 3/1/03, but the first office action does not occur until 3/1/04, one year late; (2) the 4-month deadline for patent issuance after payment of the issuance fee is 1/1/07, but the patent does not issue until 1/1/08, another year of delay attributable to the PTO. According to plaintiff, the “B period” begins running on 1/1/05, three years after the patent application was filed, and ends three years later, with the issuance of the patent on 1/1/08. In this

able to the applicant’s own delay. *See* 35

U.S.C. § 154(b)(2)(C).

example, then, the first “A period” does not overlap the “B period,” because it occurs in 2003–04, not in 2005–07. The second “A period,” which covers 365 of the same days covered by the “B period,” does overlap. Thus, in plaintiff’s submission, this patent holder is entitled to four years of adjustment (one year of “A period” delay + three years of “B period” delay). But in the PTO’s view, since “the entire period during which the application was pending before the office” is considered to be “B period” for purposes of identifying “overlap,” the patent holder gets only three years of adjustment.

#### **Chevron Deference**

We must first decide whether the PTO’s interpretation is entitled to deference under *Chevron v. NRDC*, 467 U.S. 837, 104 S.Ct. 2778, 81 L.Ed.2d 694 (1984). No, the plaintiffs argue, because, under the Supreme Court’s holdings in *Gonzales v. Oregon*, 546 U.S. 243, 126 S.Ct. 904, 163 L.Ed.2d 748 (2006), and *United States v. Mead Corp.*, 533 U.S. 218, 121 S.Ct. 2164, 150 L.Ed.2d 292 (2001), Congress has not “delegated authority to the agency generally to make rules carrying the force of law,” and in any case the interpretation at issue here was not promulgated pursuant to any such authority. See *Gonzales*, 546 U.S. at 255–56, 126 S.Ct. 904, citing *Mead*, 533 U.S. at 226–27, 121 S.Ct. 2164. Since at least 1996, the Federal Circuit has held that the PTO is not afforded *Chevron* deference because it does not have the authority to issue substantive rules, only procedural regulations regarding the conduct of proceedings before the agency. See *Merck & Co. v. Kessler*, 80 F.3d 1543, 1549–50 (Fed.Cir.1996).

[1] Here, as in *Merck*, the authority of the PTO is limited to prescribing “regulations establishing procedures for the application for and determination of patent term adjustments under this subsection.”

35 U.S.C. § 154(b)(3)(A) (emphasis added). Indeed, a comparison of this rulemaking authority with the authority conferred for a different purpose in the immediately preceding section of the statute makes it clear that the PTO’s authority to interpret the overlap provision is quite limited. In 35 U.S.C. § 154(b)(2)(C)(iii) the PTO is given the power to “prescribe regulations establishing the *circumstances that constitute* a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application” (emphasis added)—that is, the power to elaborate on the meaning of a particular statutory term. No such power is granted under § 154(b)(3)(A). *Chevron* deference does not apply to the interpretation at issue here.

#### **Statutory Construction**

*Chevron* would not save the PTO’s interpretation, however, because it cannot be reconciled with the plain text of the statute. If the statutory text is not ambiguous enough to permit the construction that the agency urges, that construction fails at *Chevron*’s “step one,” without regard to whether it is a reasonable attempt to reach a result that Congress might have intended. See, e.g., *MCI v. AT & T*, 512 U.S. 218, 229, 114 S.Ct. 2223, 129 L.Ed.2d 182 (1994) (“[A]n agency’s interpretation of a statute is not entitled to deference when it goes beyond the meaning that the statute can bear.”).

The operative question under 35 U.S.C. § 154(b)(2)(A) is whether “periods of delay attributable to grounds specified in paragraph (1) overlap.” The only way that periods of time can “overlap” is if they occur on the same day. If an “A delay” occurs on one calendar day and a “B delay” occurs on another, they do not overlap, and § 154(b)(2)(A) does not limit the extension to one day. Recognizing this,

the PTO defends its interpretation as essentially running the “period of delay” under subsection (B) from the filing date of the patent application, such that a period of “B delay” *always overlaps* with any periods of “A delay” for the purposes of applying § 154(b)(2)(A).

[2] The problem with the PTO’s construction is that it considers the application *delayed* under § 154(b)(1)(B) during the period *before it has been delayed*. That construction cannot be squared with the language of § 154(b)(1)(B), which applies “if the issue of an original patent is *delayed* due to the failure of the United States Patent and Trademark Office to issue a patent within 3 years.” (Emphasis added.) “B delay” begins when the PTO has failed to issue a patent within three years, not before.

The PTO’s interpretation appears to be driven by Congress’s admonition that any term extension “not exceed the actual number of days the issuance of the patent was delayed,” and by the PTO’s view that “A delays” during the first three years of an applications’ pendency inevitably lead to “B delays” in later years. Thus, as the PTO sees it, if plaintiffs’ construction is adopted, one cause of delay will be counted twice: once because the PTO has failed to meet an administrative deadline, and again because that failure has pushed back the entire processing of the application into the “B period.” Indeed, in the example set forth above, plaintiffs’ calendar-day construction does result in a total effective patent term of 18 years under the (B) guarantee, so that—again from the PTO’s viewpoint—the applicant is not “compensated” for the PTO’s administrative delay, he is benefitted by it.

But if subsection (B) had been intended to guarantee a 17-year patent term and *no more*, it could easily have been written that way. It is true that the legislative

context—as distinct from the legislative history—suggests that Congress may have intended to use subsection (B) to guarantee the 17-year term provided before GATT. But it chose to write a “[g]uarantee of no more than 3-year application pendency,” 35 U.S.C. § 154(b)(1)(B), not merely a guarantee of 17 effective years of patent term, and do so using language separating that guarantee from a different promise of prompt administration in subsection (A). The PTO’s efforts to prevent windfall extensions may be reasonable—they may even be consistent with Congress’s intent—but its interpretation must square with Congress’s words. If the outcome commanded by that text is an unintended result, the problem is for Congress to remedy, not the agency.

Norman A. THOMAS, Plaintiff,

v.

DISTRICT OF COLUMBIA  
GOVERNMENT, et al.,  
Defendants.

Civil Action No. 07-1286(HHK).

United States District Court,  
District of Columbia.

Sept. 30, 2008.

**Background:** Alien brought action seeking to have records of time he spent in state and District of Columbia custody corrected in order to be in better position to avoid order of removal. District and Department of Homeland Security moved to dismiss.

cent of his annual workload. *Id.* at 15:12–16. Moreover, according to Geiseler, the need to review proposed legislation and FDIC regulations, tasks that had also been performed by the plaintiff, had diminished. *Id.* at 16:14–17:22.

In the final analysis, the Court is not persuaded that the plaintiff has provided sufficient evidence to persuade a reasonable jury that “the defendant intentionally discriminated against [her]. . . .” *Burdine*, 450 U.S. at 253, 101 S.Ct. 1089. Accordingly, the defendant is entitled to summary judgment on the plaintiff’s Title VII race discrimination claim.

#### IV. Conclusion

For the foregoing reasons, the Court concludes that the plaintiff has failed to show that the defendant’s legitimate, non-discriminatory reason for her reassignment was a pretext for discrimination and therefore the defendant’s motion for summary judgment must be granted.

**SO ORDERED** on this 30th day of September, 2008.<sup>10</sup>

**WYETH, et al., Plaintiffs,**

**v.**

**Jon W. DUDAS, Under Secretary of  
Commerce for Intellectual Property  
and Director of U.S. Patent and  
Trademark Office, Defendant.**

**Civil Action No. 07–1492 (JR).**

United States District Court,  
District of Columbia.

Sept. 30, 2008.

**Background:** Patent owners brought action challenging method used by Patent

<sup>10</sup> An Order consistent with this Court’s ruling is being issued simultaneously with this

and Trademark Office (PTO) to calculate extensions of patent terms for certain specified kinds of PTO delay.

**Holding:** The District Court, James Robertson, J., held that extension of patent term based on PTO delay could exceed three years.

Ordered accordingly.

#### 1. Patents ⇌ 133

Patent and Trademark Office’s (PTO) interpretation of statute providing extensions of patent terms for certain specified kinds of PTO delay was not entitled to *Chevron* deference. 35 U.S.C.A. § 154(b)(2)(C)(iii), (b)(3)(A).

#### 2. Patents ⇌ 133

Extension of patent term for any administrative delay by Patent and Trademark Office (PTO) in issuing patent more than three years after filing date did not necessarily overlap with extensions provided as result of PTO’s failure to comply with enumerated statutory deadlines, and thus statutory prohibition against double-counting did not preclude patent applicants from claiming extensions in excess of three years. 35 U.S.C.A. § 154(b).

David O. Bickart, Kaye Scholer LLP, Washington, DC, Patricia A. Carson, Kaye Scholer LLP, New York, NY, for Plaintiffs.

Fred Elmore Haynes, U.S. Attorney’s Office, Washington, DC, for Defendant.

opinion.

**MEMORANDUM OPINION**

JAMES ROBERTSON, District Judge.

Plaintiffs here take issue with the interpretation that the United States Patent and Trademark Office (PTO) has imposed upon 35 U.S.C. § 154, the statute that prescribes patent terms. Section 154(a)(2) establishes a term of 20 years from the day on which a successful patent application is first filed. Because the clock begins to run on this filing date, and not on the day the patent is actually granted, some of the effective term of a patent is consumed by the time it takes to prosecute the application. To mitigate the damage that bureaucracy can do to inventors, the statute grants extensions of patent terms for certain specified kinds of PTO delay, 35 U.S.C. § 154(b)(1)(A), and, regardless of the reason, whenever the patent prosecution takes more than three years. 35 U.S.C. § 154(b)(1)(B). Recognizing that the protection provided by these separate guarantees might overlap, Congress has forbidden double-counting: "To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed." 35 U.S.C. § 154(b)(2)(A). Plaintiffs claim that the PTO has misconstrued or misapplied this provision, and that the PTO is denying them a portion of the term Congress has provided for the protection of their intellectual property rights.

**Statutory Scheme**

Until 1994, patent terms were 17 years from the date of issuance. *See* 35 U.S.C. § 154 (1992) ("Every patent shall contain ... a grant ... for the term of seventeen years ... of the right to exclude others

from making, using, or selling the invention throughout the United States...."). In 1994, in order to comply with treaty obligations under the General Agreement on Tariffs and Trade (GATT), the statute was amended to provide a 20-year term from the date on which the application is first filed. *See* Pub.L. No. 103-465, § 532, 108 Stat. 4809, 4984 (1994). In 1999, concerned that extended prosecution delays could deny inventors substantial portions of their effective patent terms under the new regime, Congress enacted the American Inventors Protection Act, a portion of which—referred to as the Patent Term Guarantee Act of 1999—provided for the adjustments that are at issue in this case. Pub.L. No. 106-113, §§ 4401-4402, 113 Stat. 1501, 1501A-557 (1999).

As currently codified, 35 U.S.C. § 154(b) provides three guarantees of patent term, two of which are at issue here. The first is found in subsection (b)(1)(A), the "[g]uarantee of prompt Patent and Trademark Office response." It provides a one-day extension of patent term for every day that issuance of a patent is delayed by a failure of the PTO to comply with various enumerated statutory deadlines: fourteen months for a first office action; four months to respond to a reply; four months to issue a patent after the fee is paid; and the like. *See* 35 U.S.C. § 154(b)(1)(A)(i)-(iv). Periods of delay that fit under this provision are called "A delays" or "A periods." The second provision is the "[g]uarantee of no more than 3-year application pendency." Under this provision, a one-day term extension is granted for every day greater than three years after the filing date that it takes for the patent to issue, regardless of whether the delay is the fault of the PTO.<sup>1</sup> *See* 35 U.S.C.

1. Certain reasons for exceeding the three-year pendency period are excluded, *see* 35 U.S.C.

§ 154(b)(1)(b)(i)-(iii), as are periods attribut-

§ 154(b)(1)(B). The period that begins after the three-year window has closed is referred to as the "B delay" or the "B period". ("C delays," delays resulting from interferences, secrecy orders, and appeals, are similarly treated but were not involved in the patent applications underlying this suit.)

The extensions granted for A, B, and C delays are subject to the following limitation:

**(A) In general.**—To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

35 U.S.C. § 154(b)(2)(A). This provision is manifestly intended to prevent double-counting of periods of delay, but understanding that intent does not answer the question of what is double-counting and what is not. Proper interpretation of this proscription against windfall extensions requires an assessment of what it means for "periods of delay" to "overlap."

The PTO, pursuant to its power under 35 U.S.C. § 154(b)(3)(A) to "prescribe regulations establishing procedures for the application for and determination of patent term adjustments," has issued final rules and an "explanation" of the rules, setting forth its authoritative construction of the double-counting provision. The rules that the PTO has promulgated essentially parrot the statutory text, *see* 37 C.F.R. § 1.703(f), and so the real interpretive act is found in something the PTO calls its Explanation of 37 CFR 1.703(f) and of the United States Patent and Trademark Office Interpretation of 35 U.S.C. § 154(b)(2)(A), which was published on

June 21, 2004, at 69 Fed.Reg. 34238. Here, the PTO "explained" that:

the Office has consistently taken the position that if an application is entitled to an adjustment under the three-year pendency provision of 35 U.S.C. § 154(b)(1)(B), *the entire period during which the application was pending before the Office* (except for periods excluded under 35 U.S.C. § 154(b)(1)(B)(i)-(iii)), and not just the period beginning three years after the actual filing date of the application, *is the relevant period under 35 U.S.C. § 154(b)(1)(B) in determining whether periods of delay "overlap" under 35 U.S.C. 154(b)(2)(A).*

69 Fed.Reg. 34238 (2004) (emphasis added). In short, the PTO's view is that any administrative delay under § 154(b)(1)(A) overlaps any 3-year maximum pendency delay under § 154(b)(1)(B): the applicant gets credit for "A delay" or for "B delay," whichever is larger, but never A + B.

In the plaintiffs' submission, this interpretation does not square with the language of the statute. They argue that the "A period" and "B period" overlap only if they occur on the same calendar day or days. Consider this example, proffered by plaintiff: A patent application is filed on 1/1/02. The patent issues on 1/1/08, six years later. In that six-year period are two "A periods," each one year long: (1) the 14-month deadline for first office action is 3/1/03, but the first office action does not occur until 3/1/04, one year late; (2) the 4-month deadline for patent issuance after payment of the issuance fee is 1/1/07, but the patent does not issue until 1/1/08, another year of delay attributable to the PTO. According to plaintiff, the "B period" begins running on 1/1/05, three years after the patent application was filed, and ends three years later, with the issuance of the patent on 1/1/08. In this

able to the applicant's own delay. *See* 35 U.S.C. § 154(b)(2)(C).

example, then, the first "A period" does not overlap the "B period," because it occurs in 2003–04, not in 2005–07. The second "A period," which covers 365 of the same days covered by the "B period," does overlap. Thus, in plaintiff's submission, this patent holder is entitled to four years of adjustment (one year of "A period" delay + three years of "B period" delay). But in the PTO's view, since "the entire period during which the application was pending before the office" is considered to be "B period" for purposes of identifying "overlap," the patent holder gets only three years of adjustment.

#### **Chevron Deference**

We must first decide whether the PTO's interpretation is entitled to deference under *Chevron v. NRDC*, 467 U.S. 837, 104 S.Ct. 2778, 81 L.Ed.2d 694 (1984). No, the plaintiffs argue, because, under the Supreme Court's holdings in *Gonzales v. Oregon*, 546 U.S. 243, 126 S.Ct. 904, 163 L.Ed.2d 748 (2006), and *United States v. Mead Corp.*, 533 U.S. 218, 121 S.Ct. 2164, 150 L.Ed.2d 292 (2001), Congress has not "delegated authority to the agency generally to make rules carrying the force of law," and in any case the interpretation at issue here was not promulgated pursuant to any such authority. See *Gonzales*, 546 U.S. at 255–56, 126 S.Ct. 904, citing *Mead*, 533 U.S. at 226–27, 121 S.Ct. 2164. Since at least 1996, the Federal Circuit has held that the PTO is not afforded *Chevron* deference because it does not have the authority to issue substantive rules, only procedural regulations regarding the conduct of proceedings before the agency. See *Merck & Co. v. Kessler*, 80 F.3d 1543, 1549–50 (Fed.Cir.1996).

[1] Here, as in *Merck*, the authority of the PTO is limited to prescribing "regulations establishing procedures for the application for and determination of patent term adjustments under this subsection."

35 U.S.C. § 154(b)(3)(A) (emphasis added). Indeed, a comparison of this rulemaking authority with the authority conferred for a different purpose in the immediately preceding section of the statute makes it clear that the PTO's authority to interpret the overlap provision is quite limited. In 35 U.S.C. § 154(b)(2)(C)(iii) the PTO is given the power to "prescribe regulations establishing the *circumstances that constitute* a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application" (emphasis added)—that is, the power to elaborate on the meaning of a particular statutory term. No such power is granted under § 154(b)(3)(A). *Chevron* deference does not apply to the interpretation at issue here.

#### **Statutory Construction**

*Chevron* would not save the PTO's interpretation, however, because it cannot be reconciled with the plain text of the statute. If the statutory text is not ambiguous enough to permit the construction that the agency urges, that construction fails at *Chevron*'s "step one," without regard to whether it is a reasonable attempt to reach a result that Congress might have intended. See, e.g., *MCI v. AT & T*, 512 U.S. 218, 229, 114 S.Ct. 2223, 129 L.Ed.2d 182 (1994) ("[A]n agency's interpretation of a statute is not entitled to deference when it goes beyond the meaning that the statute can bear.").

The operative question under 35 U.S.C. § 154(b)(2)(A) is whether "periods of delay attributable to grounds specified in paragraph (1) overlap." The only way that periods of time can "overlap" is if they occur on the same day. If an "A delay" occurs on one calendar day and a "B delay" occurs on another, they do not overlap, and § 154(b)(2)(A) does not limit the extension to one day. Recognizing this,

the PTO defends its interpretation as essentially running the "period of delay" under subsection (B) from the filing date of the patent application, such that a period of "B delay" *always overlaps* with any periods of "A delay" for the purposes of applying § 154(b)(2)(A).

[2] The problem with the PTO's construction is that it considers the application *delayed* under § 154(b)(1)(B) during the period *before it has been delayed*. That construction cannot be squared with the language of § 154(b)(1)(B), which applies "if the issue of an original patent is *delayed* due to the failure of the United States Patent and Trademark Office to issue a patent within 3 years." (Emphasis added.) "B delay" begins when the PTO has failed to issue a patent within three years, not before.

The PTO's interpretation appears to be driven by Congress's admonition that any term extension "not exceed the actual number of days the issuance of the patent was delayed," and by the PTO's view that "A delays" during the first three years of an applications' pendency inevitably lead to "B delays" in later years. Thus, as the PTO sees it, if plaintiffs' construction is adopted, one cause of delay will be counted twice: once because the PTO has failed to meet an administrative deadline, and again because that failure has pushed back the entire processing of the application into the "B period." Indeed, in the example set forth above, plaintiffs' calendar-day construction does result in a total effective patent term of 18 years under the (B) guarantee, so that—again from the PTO's viewpoint—the applicant is not "compensated" for the PTO's administrative delay, he is benefitted by it.

But if subsection (B) had been intended to guarantee a 17-year patent term and *no more*, it could easily have been written that way. It is true that the legislative

context—as distinct from the legislative history—suggests that Congress may have intended to use subsection (B) to guarantee the 17-year term provided before GATT. But it chose to write a "[g]uarantee of no more than 3-year application pendency," 35 U.S.C. § 154(b)(1)(B), not merely a guarantee of 17 effective years of patent term, and do so using language separating that guarantee from a different promise of prompt administration in subsection (A). The PTO's efforts to prevent windfall extensions may be reasonable—they may even be consistent with Congress's intent—but its interpretation must square with Congress's words. If the outcome commanded by that text is an unintended result, the problem is for Congress to remedy, not the agency.

Norman A. THOMAS, Plaintiff,

v.

DISTRICT OF COLUMBIA  
GOVERNMENT, et al.,  
Defendants.

Civil Action No. 07-1286(HHK).

United States District Court,  
District of Columbia.

Sept. 30, 2008.

**Background:** Alien brought action seeking to have records of time he spent in state and District of Columbia custody corrected in order to be in better position to avoid order of removal. District and Department of Homeland Security moved to dismiss.

Sir:

Applicants received a communication from a third party ("Information") which we wish to be placed in the file of the above-identified application for completeness. The third party has requested that such disclosure of the Information to the U.S. Patent and Trademark Office ("USPTO") be submitted in accordance with MPEP § 724, accompanied by a petition under 37 C.F.R. § 1.59 with the appropriate fee.

In connection with the third party request, Applicants submit herewith a sealed envelope containing the Information pursuant to the provisions of MPEP § 724. Applicants request that the sealed envelope be placed in an Artifact Folder in the above-referenced application for review only by the above-referenced Examiner or other authorized USPTO employees.

In addition, Applicants submit herewith a Petition To Expunge Proprietary or Trade Secret Material Not Open to Public under 37 C.F.R. § 1.59.

Respectfully submitted,

Filed: November 14, 2003  
Attorney Docket No.: 6923-118

:  
:  
: PETITION DECISION  
:  
:

This is in response to the petition under 37 CFR § 1.59(b), filed May 7, 2009, to expunge information from the above identified application. This application has been allowed.

Petitioner requests that the information submitted to the Patent Office on May 7, 2009 be expunged from the record. Petitioner states either: (A) that the information contains trade secret material, proprietary material and/or material that is subject to a protective order which has not been made public; or (B) that the information submitted was unintentionally submitted and the failure to obtain its return would cause irreparable harm to the party who submitted the information or to the party in interest on whose behalf the information was submitted, and the information has not otherwise been made public. The petition fee set forth in 37 CFR § 1.17(g) has been paid.

The reasons set forth in this petition establishes to the satisfaction of the Director that expungement of the information is appropriate. The file entries for those documents have been closed and as such the documents are no longer publicly available, which is the IFW equivalent to removal of a paper document from a paper file wrapper.

Therefore, petitioner's petition is GRANTED.

Should there be any questions about this decision please contact Marianne C. Seidel by letter addressed to Director, TC 1600, at the address listed above, or by telephone at 571-272-0584 or by facsimile sent to the general Office facsimile number, 703-872-9306.
